

Joules Electric Reviews & References

“GREAT ELECTRICIANS!! Like many people on the mountain, I’ve had my share of irresponsible workers come through. Which it’s why I’m posting about Jordan and the crew from Joules Electric. These guys are awesome! Jordan, aside from being a super nice guy, does great work, communicates everything professionally and shows up always. They just finished installing a backup generator, an upgraded panel, two outlets in my bathrooms, two top-of-the-line bathroom heater/fans, a hardwired Ring camera and 4 additional exterior lights for my decks. I couldn’t be happier. The work was timely, affordable, professional and, best of all, I was totally comfortable giving this crew full access to my home while I was away. I can’t recommend Joules enough.” – Carlos, Lake Arrowhead, CA via Facebook
